Job Title	Senior Developer - Shopify & Magento
Function	Technology
Education	Graduate/PG in Computer Science preferred
Experience	4-5 yrs in Ecommerce Web Development
Location	WFH (should be open to relocate)

Company Overview

EcomMasters was founded by a team of IIT-IIM marketing professionals, with a vision to propel growth for D2C brands & established offline brands. We are passionate about driving consistent ecommerce sales for our clients across multiple platforms. We work with brands as experts to build a bespoke integrated ecommerce marketing funnel, thereby delivering great ROIs across brand websites as well as marketplaces like Amazon and Flipkart.

Job Description

We are looking to hire a skilled Shopify Developer to be responsible for managing our client's website hosted on the Shopify platform, both from a maintenance perspective as well as new development.

You will be responsible for both back-end and front-end development of the website primarily with the eCommerce platform Shopify.

Responsibilities

- Work closely with the client and with the project managers to drive the Shopify project
- Creating the website architecture.
- Generate custom-tailored Shopify themes and altering pre-existing templates.
- Act as a Shopify expert, specializing in all facets of the e-commerce platform.
- Strong hands to Install & Customize the new Shopify theme.
- Knowledge in other e-commerce platforms like Magento, WooCommerce, BigCommerce will be preferred.
- Working closely with cross-functional teams to address client requests
- Understanding of Product, Discount, Order APIs and customizations using the APIs
- Awareness of the Marketing Events, Discounts, Gift Cards and their configurations in Shopify

Qualifications

- 4+ Year relevant experience
- Bachelor's degree in Computer Science or a similar field.
- Working Experience on Shopify Platform along with exposure towards application development.
- Comfort using programming languages and relational databases
- Strong debugging and troubleshooting skills
- Strong knowledge of liquid programming language
- Clear concept of HTML5, CSS3, Javascript/Jquery.
- Ability to project manage.
- Good communication skills.
- Skills:- Shopify, HTML/CSS, RESTful APIs, Javascript and jQuery
